### **DETAILED ACTION**

1. Applicant's amendment received October 29, 2003 is acknowledged and entered. Claims 12-25 are pending. Claims 12-24 are examined. Claim 25 remains withdrawn from consideration as being directed to a non-elected invention.
2. The objection to claims 18-24 is withdrawn in view of Applicant's amendment. The rejection of claim 15 under 35 U.S.C. 102(b) is withdrawn in view of Applicant's amendment.

### ***Claim Rejections - 35 USC § 101***

3. Claims 12-15, 18-23 and claims 16-17 (newly included due to Applicant's amendment changing dependency) remain rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter, for reasons of record. Applicant amended the claims to recite "[A] partial peptide". Applicant's amendment and arguments have been carefully considered but fail to persuade the withdrawal of the rejection. A partial peptide can be a product of degradation and is therefore a product of nature. Applicant's substantive argument is primarily directed to the argument that the claimed peptides are not products of nature. In response, the claims are drawn to a peptides consisting of various sequences which are, unless otherwise indicated, products of nature. Applicant also argues that the claimed invention is not the same as the invention claimed in US Patent 6,503,729. In response, the rejection is based on the utility requirement that a claimed product cannot be a product of nature. Whether or not the product claimed by Applicant is the same as the invention claims in 6,503,729 is not relevant to meeting the utility requirement. The claims must clearly indicate that the peptide is isolated or purified in order to overcome the utility rejection.

*Conclusion*

4. No claim is allowed. In the event that the claims are found allowable during the course of future prosecution, and method claim 25 is rejoined (as mentioned in Applicant's response filed October 29, 2003, page 4, third paragraph), the claim should include complete method steps. The methods steps should include a source from which the viruses are removed in order to avoid a rejection under 35 U.S.C. 112, second paragraph, for incomplete method steps.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
